

# DENVER GREENE

AI Software Engineer & Architect | C#, Azure, React, LLMs, Python  
(702) 899-0350 • greenedenver771@gmail.com • United States of America

## Summary

I help companies turn complex software and AI ideas into systems they can actually ship and operate. Whether you're adding AI to an existing .NET product, building an LLM-powered SaaS platform, or untangling a system that has outgrown its original architecture, I can own the technical path from design through production. My background spans C#/.NET, Azure, React, Python, and applied AI engineering. I've worked across SaaS, enterprise applications, automation platforms, data-heavy systems, and AI products, often on projects where the challenge is not writing one feature but making several technologies work reliably together. I work independently and can also integrate with an existing engineering or product team. I'm comfortable taking ownership of architecture and implementation while communicating technical tradeoffs clearly to founders, product leaders, and other engineers.

## Key Achievements

### 💎 AI & LLM Architecture

Built production AI systems integrating RAG, AI agents, and LLM workflows into SaaS applications.

### 💎 Cloud & .NET Optimization

Modernized .NET/Azure systems to improve performance, reliability, scalability, and deployment efficiency.

### 💎 Full-Stack Product Delivery

Led end-to-end delivery of SaaS and AI products from architecture through production deployment.

## Experience

### Microsoft Corporation

#### Senior AI Engineer & LLM Developer

04/2024 - 05/2026

- Designed and delivered production AI/LLM solutions using C#, Python, Azure OpenAI, RAG, embeddings, and vector search.
- Built AI agents, document-processing pipelines, semantic search, and structured data extraction workflows.

### TechSoft LLC

#### Senior Full-stack Engineer

06/2020 - 11/2023

- Developed and maintained SaaS and enterprise applications using C#/.NET Core, ASP.NET Core, React, TypeScript, PostgreSQL, and REST APIs.
- Designed backend services, authentication systems, integrations, background processing, and complex business workflows.
- Implemented Docker and CI/CD pipelines to streamline development, testing, and production releases.

### Impact Technologies

#### C#, .Net Expert

03/2016 - 04/2020

- Built out scalable cloud-native services on AWS to support global manufacturing and supply chain operations.
- Streamlined internal workflows by designing and implementing developer-friendly RESTful services and automated CI/CD pipelines.
- Managed large-scale NoSQL databases, ensuring high availability and data integrity across distributed systems.

## Education

### Webster University

08/2013 - 09/2017

#### Bachelor of Computer Science

- Focused on software engineering, algorithms, databases, and distributed systems, with a strong foundation in C#, .NET, and modern application development.

## Skills

Artificial Intelligence • Python • Large Language Model • AI Agent Development • Retrieval Augmented Generation • OpenAI API • Claude • LLM • Prompt Engineering • Generative AI • C# • .NET Core • ASP.NET • Microsoft Azure • FastAPI • React • TypeScript • Node.js • PostgreSQL • Docker • Amazon Web Services
